INTRODUCTION

Working world moment This No Aga dominated by the Adam . Women have have wide opportunities For have a career in various sector life . Shift role woman from sector domestic to sector public means also affects functions inherent in women . This is related with role woman as mother who at first only functioning as caregiver . Mother's goal enter in the public sector Of course just No For off not quite enough answer as caregiver for children but more to help head family in sufficient need life family .

Family is all the party that has connection blood or descendants , family consists of from parents (father- mother) and children (if have descendants) . in the era of globalization Now felt increase the amount type influences and challenges , as well as demands and changes that will occur can influence views , attitudes and behavior children . parents in general not enough realize or not enough care and lack understand about roles and responsibilities the answer as the occupying party position strategic in manage family as institution education .

Work is something that is needed by humans , which is in themselves man there is needs that at the right time to form the goals to be achieved achieve and fulfill it . For the sake of achieving objective that , people are motivated do a activity called with Work . Work for

example there is something to be traders , farmers , teachers, doctors , lecturers , laborers , midwives , and so on . And there is also the sector private like guard shops and entrepreneurs private , besides That there are also those who work in sector service such as , guide tour and driver .

Almost all parents in Indonesia even in the world gets not quite enough answer For accompany child especially child age tk For Study at home . Every parent who accompanies child his Study At home will feel How to be a teacher for his son alone , for parents who remain must Work is When time For accompany child moment left behind Work .

Work is activity main thing done by humans , work used For a task or work that makes money for someone . Parents is central former behavior child since early child Still weak and still in dire need guidance from the people around him . The busyness of his parents No means the disappearance not quite enough answer to care for even though majority time spent in place parents work should still give proper parenting give proper parenting moment they is at at home and have the opportunity interact with children . nature child part big absorbed from parents and members other families . Because of aspect time , activities child Lots spent in the environment family , then parents opportunity in educate child the more big .

Bond psychological and emotional child with parents specifically Mother own proximity , if a Mother yng Work use time the best with always know development child , asking activity children at school , giving love full of love to children , and communicate every time after Mother go home work , then will impressive positive on development emotional children . The emotion important Because man own need For maintain self , make decision , create limitations and create unity . Feeling of love and affection love , mutual feeling have , feel accepted What existence given chance For independent and make decision alone , feeling safe , given confidence in himself , treated someone who has identity .

Importance environment around child in train a sense of trust self and social Can started from environment family . Ability somebody arrange life social with intelligence , guarding intelligence emotions , social , and their expression through skills awareness self , experience self , motivation self , empathy and skills social Mother play a very big role . Working parents all day long outside House will influence parental attention to children . Lack of that person's supervision to child can cause child lost guidelines about good and bad deeds Good to be done . Based on background back on top so researcher interested lift title in activity devotion public regarding “ Impact Parents' Occupation Against Development Child Psychology in Lembah Bahbutong Village I.”

RESEARCH METHODS

Research methods field is method with approach in research involving direct data collection from environment or relevant location with Topic study . Research very public field in knowledge social sciences , anthropology , sociology , and other fields that require observation or interaction direct with object or subject research . Research field aiming For collect primary data direct from environment study For understand current phenomenon investigated in a way contextual .

Data obtained tend more realistic and descriptive the situation in the village said . Research This done with observation that is observe in a way direct situation or behavior subjects in the field . Also done with interview that is submit question open or closed in a way direct to subject research in Bah Butong Village 1.

DISCUSSION AND RESULTS

Education in the environment Mother can influential in life social child For grow and develop in accordance with level achievement development child such as , religious, social and emotional morals . Cultivation strong emotions will to form character strong and able child understand and control emotion in accordance with conditions in the environment . Ability manage emotional and social with good to yourself yourself and others, using feeling feeling That For contain thoughts and actions . Social emotional child often changed , seen when arrive at school emotions that arise is pouting , crying , even want to go home return to House .

Influence family in formation and development personality very big child , many factor in the family who attended influential in development child among them income family , parental education , employment status Mother Rosliana , according to ma'am Rosliana the magnitude family , order birth , parents ' personal and practice parenting to his son is the most influential factor in formation personality child also employment status mother and practice parenting to his son (pattern) parenting) . Aspect development in children self children who need involving parental guidance is development behavior social- emotional . Most parents realize existence close relationship between behavior social - emotional child with success and happiness in childhood and later life next . For ensure that can do adjustment with okay , parents give chance to For to weave contact social-emotional with other children , and try Motivate the children to be active in a way social .

In the process of development social - emotional children , usually a child Not yet own ability For hang out with other people. To reach maturity social , children must Study about method adapt self with other people. Likewise with emotion child , even though emotion child nature egocentric but the Son will develop with Healthy if guided with full love darling , so with love love parents and the environment good family child will capable socialize with Good .

With thus can withdrawn conclusion that There is influence parents ' job to development psychological children in Lembah Bahbutong I Village , results study This show that existence the impact caused by parents ' work to psychological child can in the form of positive and negative . Here the explanation :

Impact Positive
